RESPONSE TO MEDIA SPECULATION

In response to media speculation, Infigen Energy (ASX: IFN) confirms that it continues to assess a range of options to provide improved financial flexibility.

As previously disclosed to the market, Infigen continues to deal constructively with bona fide approaches in relation to its strategy, including (amongst other things) potential asset sales.

Reflecting ongoing interest in the Group, Infigen confirms that it has recently received an increased level of preliminary enquiries from investment banks and others, and from time to time engages in confidential discussions to assess any available options. However, none of these matters is sufficiently advanced to require disclosure.

Infigen will consider options that advance the Group's strategy and where acceptable value can be achieved for securityholders. Infigen will provide further disclosure to the market if and when it becomes required under the continuous disclosure provisions.

About Infigen Energy

Infigen Energy is a specialist renewable energy business. We have interests in 36 wind farms across Australia, the United States and Germany. With a total installed capacity in excess of 1,700MW (on an equity interest basis), we currently generate over 4,200GWh of renewable energy per year, sufficient to power over half a million households.

As a fully integrated renewable energy business in Australia, we develop, build, own and operate energy generation assets and directly manage the sale of the electricity that we produce to a range of customers in the wholesale market.

Regulatory frameworks in Australia and around the world are enforcing a progressive increase in the use of energy from renewable sources. Infigen is well positioned to participate in this mandated growth in demand over coming years.

Infigen Energy trades on the Australian Securities Exchange under the code IFN.
