RESPONSE TO MEDIA REPORTING

Infigen Energy (ASX: IFN) notes reporting today in *The Australian Financial Review* concerning potential interest in Infigen.

The Commonwealth Government's renewable energy scheme has created a significant opportunity for investment in new renewable energy projects over the period to 2020, with over 5,000MW of new capacity required to meet the current Renewable Energy Target.

Infigen is currently Australia's largest wind energy producer with 557MW of installed capacity and a pipeline of over 1,000MW of projects with development approval.

In the context of the improved market environment for renewable energy, Infigen is exploring a range of options on how to best participate in the growth opportunities and maximize value for its securityholders.

This exploration of alternatives is at a preliminary stage and there is no certainty it will lead to any particular transaction.

About Infigen Energy

Infigen Energy (Infigen) is a developer, owner and operator of renewable energy generation in Australia. We own six wind farms and a solar farm with a combined installed capacity of 557 megawatts operating in New South Wales, South Australia and Western Australia.

Infigen's operating assets generate enough power to meet the needs of over 250,000 homes saving over a million tonnes of carbon dioxide emissions each year.

Infigen's development pipeline comprises approximately 1,100 megawatts of large-scale wind and solar projects spread across five states in Australia.

Infigen trades on the Australian Securities Exchange (ASX) under the code IFN.
