As electricity flows through the transmission and distribution networks, energy is lost due to electrical resistance and the heating of conductors. Revenue is subject to marginal loss factors that are fixed annually by the Australian Energy Market Operator to account for network losses.

Monthly Production Generated in prior Financial Years for Infigen's Owned Assets⁴

As previously advised, the Bureau of Meteorology estimates that there is a 70% chance of an El Niño weather pattern developing in the southern hemisphere autumn or winter. El Niño periods can result in lower than average wind production.

¹ Some totals may not add down the column or across the row (where applicable) due to rounding of individual components. Variance is reported as a percentage and is based on unrounded figures.

² Owned Assets refers to Infigen's 7 operating wind farms.

³ Contracted Assets refers to production acquired under run of plant PPAs where Infigen is the offtaker.

⁴ Practical completion of the Bodangora Wind Farm was achieved in FY19. In the prior periods FY14-FY18 there was no contribution to production by Bodangora Wind Farm.

Further details in relation to Production Generated from Owned Assets is reported in Appendix 1. Further details in relation to Production Sold from Owned Assets is reported in Appendix 2.
