11 July 2019

INFIGEN ANNOUNCES JUNE 2019 MONTHLY PRODUCTION

Infigen (ASX: IFN) today reported unaudited production for June 2019 as follows:

Wind Farm ¹	State	June			YTD		
		2019 (GWh)	2018 (GWh)	Variance (%)	FY19 (GWh)	FY18 (GWh)	Variance (%)
Alinta	WA	23	16	44	342	316	8
Bodangora	NSW	24	-	n/m	224	-	n/m
Capital	NSW	20	32	(38)	359	374	(4)
Lake Bonney 1	SA	16	16	0	200	199	0
Lake Bonney 2	SA	33	30	10	371	405	(8)
Lake Bonney 3	SA	9	7	29	97	103	(6)
Woodlawn	NSW	9	13	(31)	147	152	(3)
Production Generated from Owned Assets²		134	114	18	1,740	1,549	12
Production Sold from Owned Assets³		129	109	18	1,683	1,480	14
Production purchased and sold from Contracted Assets⁴		9	-	n/m	92	-	n/m

During June 2019, Production Sold from the Smithfield OCGT ("Smithfield") was 3GWh. Smithfield is a gas peaking facility where capacity utilisation is expected to be in the range of 2-8%, with significant variations in output expected from month to month. As outlined in the 23 May 2019 "Smithfield OCGT Acquisition and Capital Management Update", Smithfield complements Infigen's renewable energy portfolio and its economic contribution to Infigen is not directly related to production. As a physical firming asset, Smithfield enables Infigen to increase the volume of renewable energy it supplies to customers on a firm basis.

¹ Some totals may not add down the column or across the row (where applicable) due to rounding of individual components. Variance is reported as a percentage and is based on unrounded figures.

² Owned Assets refers to Infigen's 7 operating wind farms.

³ As electricity flows through the transmission and distribution networks, energy is lost due to electrical resistance and the heating of conductors. Revenue is subject to marginal loss factors that are fixed annually by the Australian Energy Market Operator to account for network losses.

⁴ Contracted Assets refers to production acquired under run of plant PPAs where Infigen is the offtaker.

Monthly Production Generated in prior Financial Years for Infigen’s Owned Assets⁵

Further details in relation to Production Generated from Owned Assets is reported in Appendix 1. Further details in relation to Production Sold from Owned Assets is reported in Appendix 2.

About Infigen Energy

Infigen is leading Australia’s transition to a clean energy future. Infigen generates and sources renewable energy, increases the value of intermittent renewables by firming, and provides customers with clean, reliable and competitively priced energy solutions.

Infigen generates renewable energy from its owned wind farms in New South Wales (NSW), South Australia (SA) and Western Australia (WA). Infigen also sources renewable energy from third party renewable projects under its ‘Capital Lite’ strategy. Infigen increases the value of intermittent renewables by firming them from its Smithfield OCGT in Western Sydney, NSW, and its 25MW/52MWh Battery at Lake Bonney, SA, where commercial operations are expected to commence in Q1FY20.

Infigen’s energy retailing licences are held in the National Electricity Market (NEM) regions of Queensland, New South Wales (including the Australian Capital Territory), Victoria and South Australia.

Infigen is a proud and active supporter of the communities in which it operates.

For further information, please visit: www.infigenenergy.com

⁵ In FY19 Infigen achieved practical completion of the Bodangora Wind Farm. This asset contributes to Production Generated in FY19 but did not contribute in periods FY14-FY18.
