

# Smart Electric Mobility

Vehicle emissions are one of the largest sources of greenhouse gases in the atmosphere. We support the electrification of your vehicle fleet by providing comprehensive EV Charging Solutions. Key benefits of vehicle electrification are:

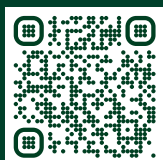

Up to 75% lower operating costs

50% lower lifetime vehicle emissions

Quieter and smoother.  
A less stressful drive

## Typical EV charging deployment process and how we can help

Stage	How Iberdrola can help
Defining a use case	Reviewing your vehicle usage to determine appropriate charger selection.
Project design	Developing a commercial and technical project scope.
Procurement and construction	Turnkey project delivery, including our industry leading QA and WHS management.
Maintenance	Continuous monitoring and regular inspections, to maximise asset life.
Tech Support	Equipment and software failure support.
Billing	Configuring charge out rates and payment systems.

Additional services that we can provide, to enable your EV charger deployment in a cost effective manner:

Load management to avoid electrical upgrades

100% Green electricity supply

Electricity rates tailored for EVs

Charging as a Service. No up-front capital cost
